

ERP Done Right. The First Time.

Microsoft Dynamics 365 Business Central
Delivered through the **DIY-ERP Framework**

**One Provider.
One Call.
One Bill.**

Modern businesses need more than software — they need an ERP that is implemented **correctly, predictably**, and **without long-term dependency**. IT&T delivers Microsoft Dynamics 365 Business Central using the proven **DIY-ERP methodology** — a structured, transparent approach that puts control and knowledge where it belongs: **with your team**.

The Problem Isn't ERP Software It's the Delivery Model

Traditional ERP implementations are plagued by:

- Cost blowouts from time-based billing
- Long, consultant-led projects with unclear outcomes
- Limited knowledge transfer to your team
- Scope creep and unpredictable timelines

These issues aren't inevitable — they're the result of an outdated delivery approach. **Business Central deserves better. So do you.**

A Better Way to Implement Business Central Take Control. Get Traction Fast.

The DIY-ERP framework is built on 25+ years of real world Business Central experience and over 300 successful implementations. Instead of creating dependence on consultants, we:

- Transfer knowledge by design
- Build internal capability early
- Use fixed pricing and defined milestones
- Ensure your team owns the system from day one

What this means for you:

- < 20 weeks to go-live
- Fixed cost — no surprises
- 100% knowledge transfer
- Structured & transparent delivery

How the DIY-ERP Framework Works

1 Learn Best Practice Implementation

We guide you through Business Central using a proven, structured approach — ensuring the right configuration, sequencing, and decisions from day one.

Outcome:

Clear roadmap

Right first time setup

Aligned stakeholders

2 Upskill Your in-house Expert

Your nominated Super User is mentored throughout the implementation, gaining deep system understanding before go-live.

Outcome:

Reduced dependency

Faster adoption

Confident internal ownership

3 Continuous Improvement

Once live, the focus shifts to optimisation and growth — not firefighting.

Outcome:

Self sufficient teams

Ongoing optimisation

long-term ERP value

Business Central + DIY-ERP Better Together

Cloud ERP you can grow with

Business Central runs on Microsoft Azure — secure, scalable, and always up to date.

Works with Microsoft 365

Your ERP evolves as your business grows — without re-implementation.

Microsoft Dynamics 365 Business Central A Proven Platform for Growing Businesses

Business Central connects:

- Finance & reporting
- Sales & CRM
- Supply chain & inventory
- Manufacturing & warehousing
- Projects & service management

All in a single, cloud-based platform — with real-time visibility across your organisation.

Named “**Best ERP System**” — Forbes Advisor

Built on Real World Experience

- 25+ years focused on Business Central
- 300+ implementations
- 6 key industries, including:
 - Not-for-Profit
 - Wholesale & Distribution
 - Manufacturing
 - Project Services
 - Service Management
 - Multi-Entity organisations

Our methodology is designed to reduce delivery risk and ensure lasting value — not just a successful go-live.

Is Your ERP Keeping Pace With Your Business?

Many organisations are running systems implemented years ago — built for a simpler version of their business.

As complexity grows:

- Manual workarounds increase
- Reporting becomes harder
- Visibility declines
- Growth slows

Business Central is continuously enhanced by Microsoft — backed by billions in ongoing investment — so your ERP keeps pace with your business, not the other way around.

The Real Risk Is Standing Still

Staying with an outdated ERP model doesn't just hold you back — it compounds cost, complexity, and missed opportunity.

Microsoft Dynamics 365 Business Central, delivered through the DIY-ERP framework, gives you:

- Predictable outcomes
- long-term control
- A platform built for growth
